

# CENTRE PIECES

## INCLUDING CENTRE BOSSES

Ceiling centre pieces date from the early Georgian period and were originally designed to protect the ceiling from the heat of candle or gas lighting. Today, centre pieces are one of the most commonly used decorative mouldings in both domestic and commercial premises. They add a real touch of elegance to any room.

The largest centre piece in our range is a little over five feet across, while for more modest applications many are available at around 18 inches. Most styles are offered with a centre finishing boss. Whether you choose the simple Rope design (CP3029) or the beautiful Adam Spray with Honeysuckle (CP3019), ensure you choose Simply Elegant.
